

ACE Program

Achieving Compliance through Education

tollos
Lightening the Load of Care

Provide a Safer Environment

Your clinicians need a safe environment. Whether it's lifting or pushing, rolling or repositioning, you want the best for them. The fact is: nursing has the third highest rate of reported injury than any other profession.¹

Your patients need a safe environment. Patient safety is a number one priority. Keeping patients from harm during their stay can help improve their experience. How the patient views their stay in your facility is now important enough to affect your reimbursement.²

Customize your Program

Tollos' clinically-driven ACE (Achieving Compliance with Education) program creates the necessary processes and awareness to ultimately drive compliance and promote a safe-patient-handling environment that lasts.

With our customized, proven curriculum, we'll teach you how to have your own sustainable plan.

Your ACE evaluation starts with a survey of the physical environment and lifting operations in your facility. A complete ACE report will provide you with everything you need to start your program.

Your ACE program includes:

- Program Planning
- Assistance in Organizing Training Sessions
- Clinically-based Super User Training
- Supported Staff Training Sessions
- Lift Program Documentation & Checklists
- Thorough Follow-Up & Ongoing Support

Training sessions are hands-on and performed in a small group setting to maximize information exchange and practical demonstrations.

ACE assists your clinicians and patients in living their best lives... free from injury.
