T019DTXM	Dual Turner, Mesh, Large		

General Information

Cleaning & Disinfecting

Reusable

Spot Cleaning: Most disinfection solutions are suitable for spot cleaning the reusable slings & harnesses. Bleach products can be used in a dilution of 100ppm or 0.01%, however, greater concentrations may cause premature deterioration of the fabrics.

Reusable slings should be laundered between patients.

Washing Instructions:

- Recommended wash cycle: BS 5651:1978 Hospital Laundry Wash (Normal)
- Recommended detergent: ECE Reference Detergent + Sodium Perborate + TAED
- Recommended Wash Cycle: 6 gallons (24 liters) of water at 165°F (74°C) for 15 minutes
Temp not to exceed 185°F (85°C).
- Recommended Rinse Cycle: 4 cycles at 104°F (40°C) for 3 minutes per cycle
- Recommended Dry Cycle: Drying cycle: BS EN ISO 6330:2012 Procedure E
Low Temp, not to exceed 120°F (50°C)

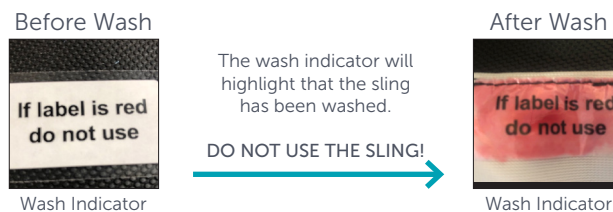

Bleach products may be used during the wash cycle in a dilution of 100ppm or 0.01%.

Single-Patient-Use

Do not wash: single patient use. Discard sling after use.

Tollos single-patient-use sling labels include a wash indicator. If the sling has been washed and recycled for use again, the wash indicator will turn red. Do not use a sling with a red wash indicator.

Single-patient-use slings & harnesses may be spot cleaned with disinfecting solutions. Tollos does not recommend the use of bleach in any dilution on single-patient-use slings & harnesses.

Sizing Guide - For most slings

Safe Working Load

X-Small	49 - 75 lbs	White	600 lbs/ 272 kg
Small	75 - 125 lbs	Red	600 lbs/ 272 kg
