

# Steady Aid® Sit-to-Stand Bariatric

Mobility improves outcomes. You know this. But how do you help a larger patient move without putting yourself at risk?

The Steady Aid Bariatric Sit-to-Stand helps clinicians perform easier seat-to-seat transfers.

This Steady Aid is designed to accommodate larger patients, yet it is easy to use and safe for you and them. Help your patients reap the benefits of getting out of bed without sacrificing your own health.

# Steady Aid Bariatric Sit-to-Stand

tollos

The Steady Aid® Bariatric Sit-to-Stand is one of the industry's safest, most ergonomic patient lifts on the market. Manufactured in North America, this lift includes a long list of standard features specifically engineered to optimize patient comfort and safety, as well as reduce caregiver injury.

The Steady Aid offers a smooth, fluid transition from a sitting position to a standing position without a lot of fuss.

## Steady Aid Features

- Safe working load: 750lb
- Smart Technology
- Power base widening
- Removable foot plate
- EZ Roll casters
- Integrated head protector & knee pad
- Four-function hand controller
- Two harness attachment points

Standard equipment includes battery operation, durable construction, emergency up/down switch, emergency stop switch, and powered base-widening system, allowing for integration with virtually every bed, chair, or stretcher.

Suppliment your lift with Tollos' Steady Aid and Steady Aid Elite Harnesses.
